What is Internet?

THE INTERNET MAPPING PROJECT

Please draw a map of the internet, as you see it. Indicate your "home."

Return to Kevin Kelly (kk@kk.org, or 149 Amapola Ave., Pacifica, CA 94004) For results see www.kk.org

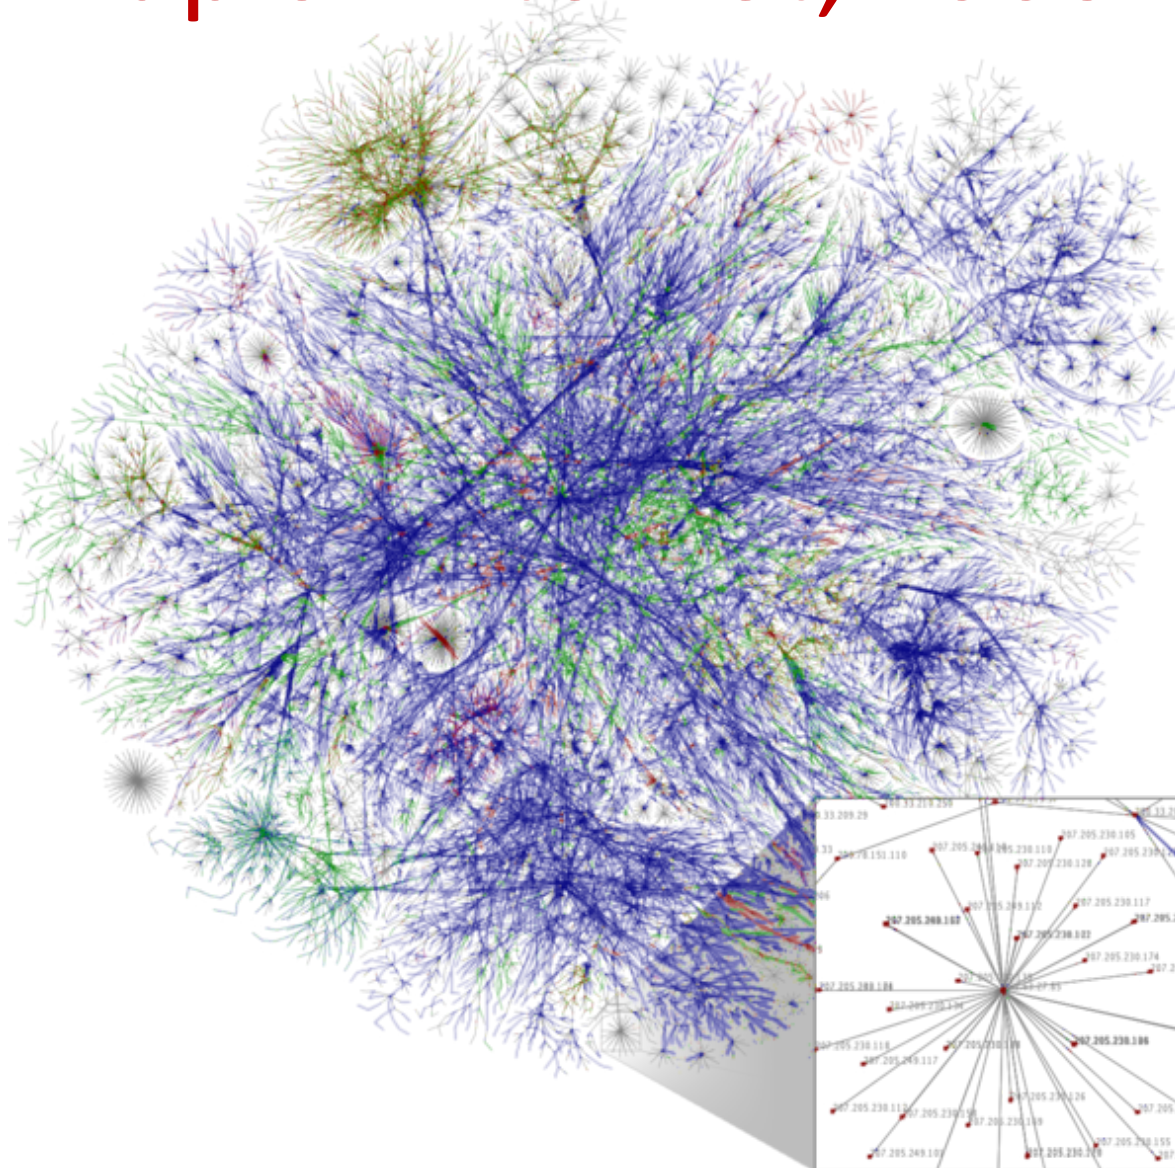

Internet begins...

- 1969 ARPANET
 - Advanced Research Projects Agency Network
 - First packet switched network

- UCLA
 - University of California, Los Angeles
- SRI
 - Stanford Research Institute
- UCSB
 - University of California, Santa Barbara
- UTAH
 - University of Utah

Map of Internet, 2003

Nielsen's law

- The end-user connectivity grows with 50% every year.

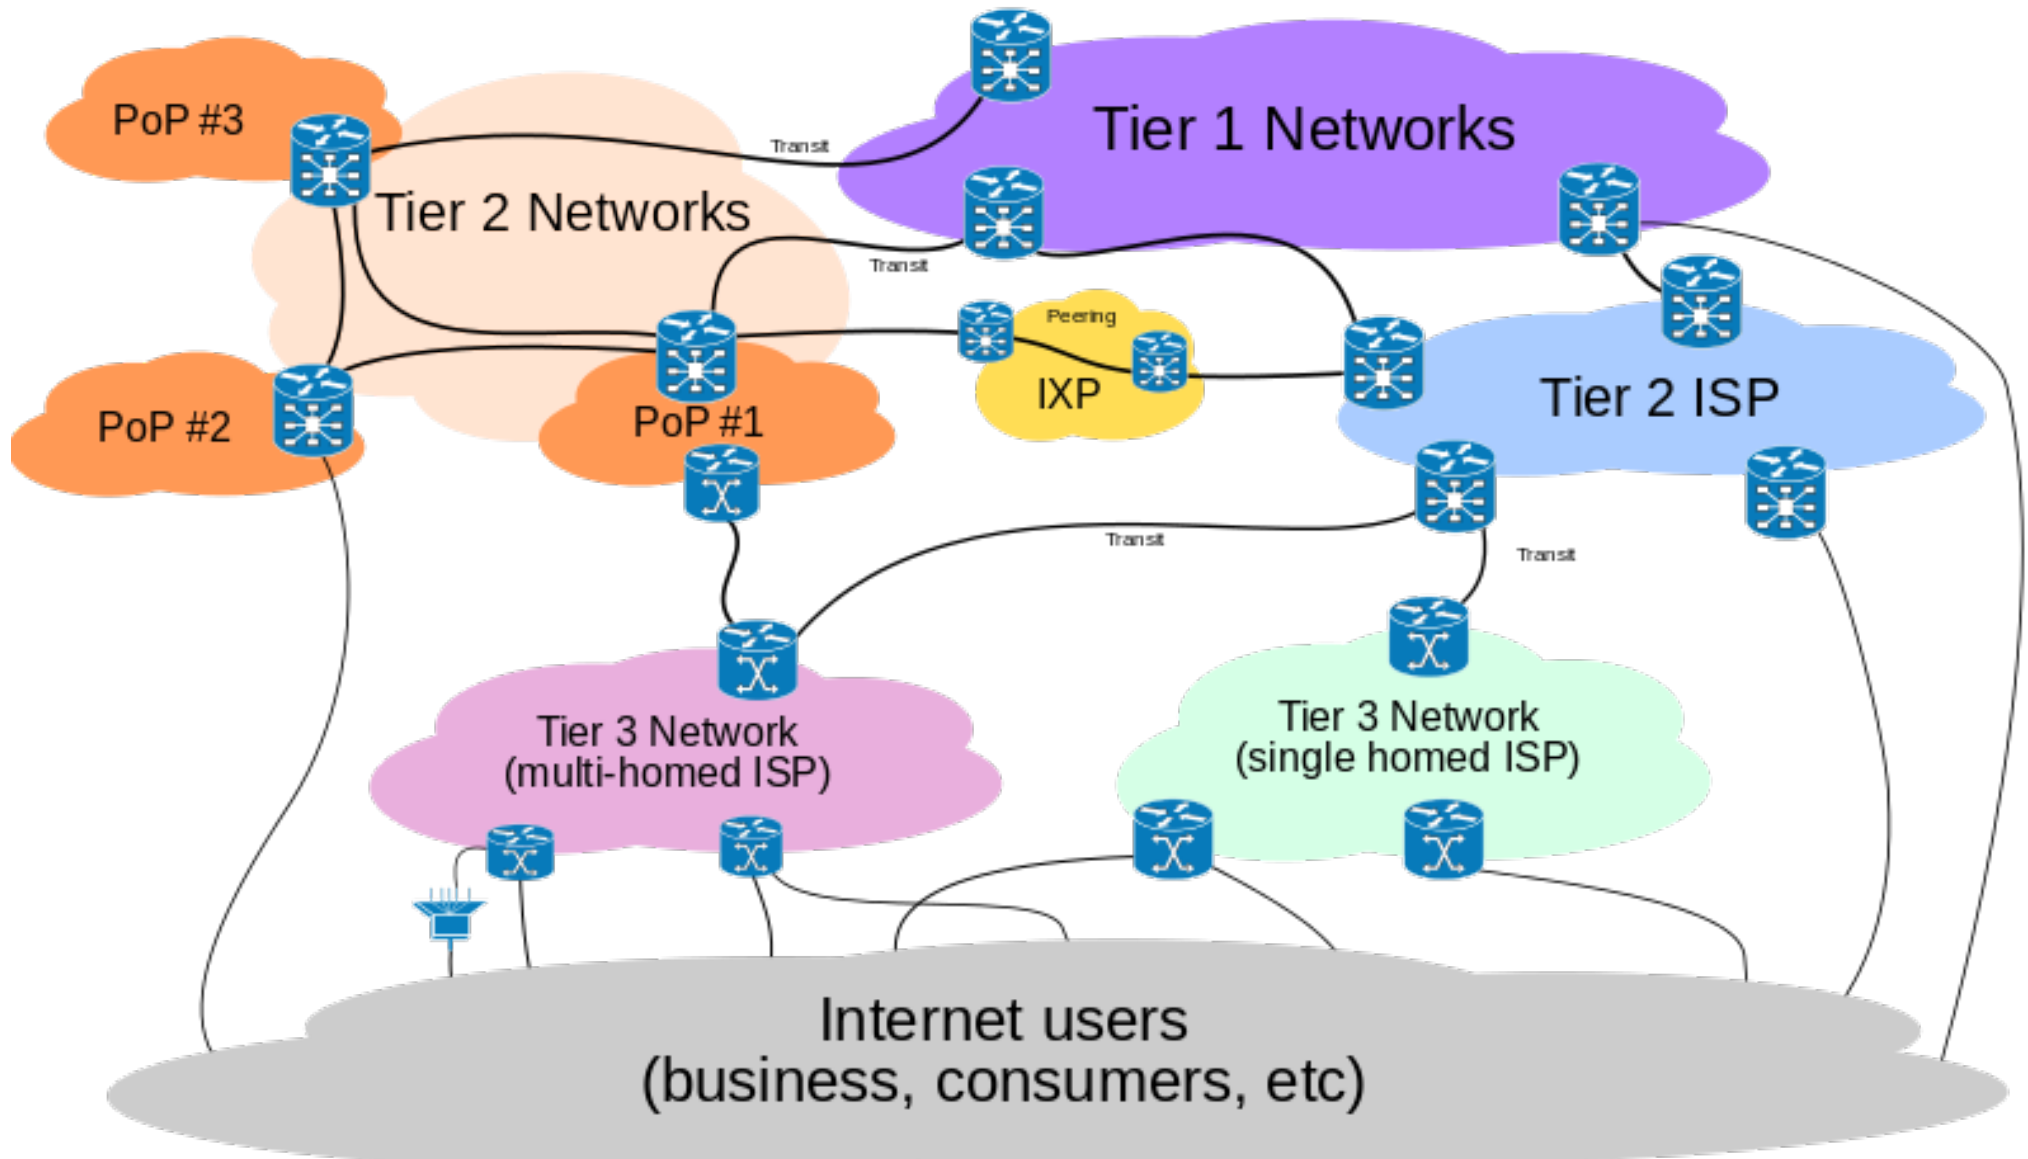

WHAT IS INTERNET?

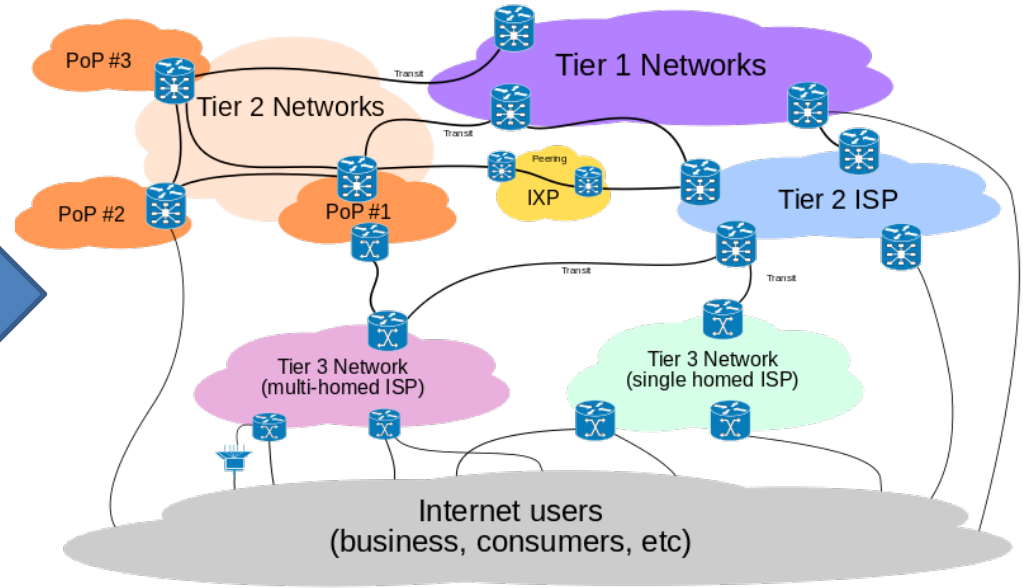

Internet – users' view

Internet – engineers' view

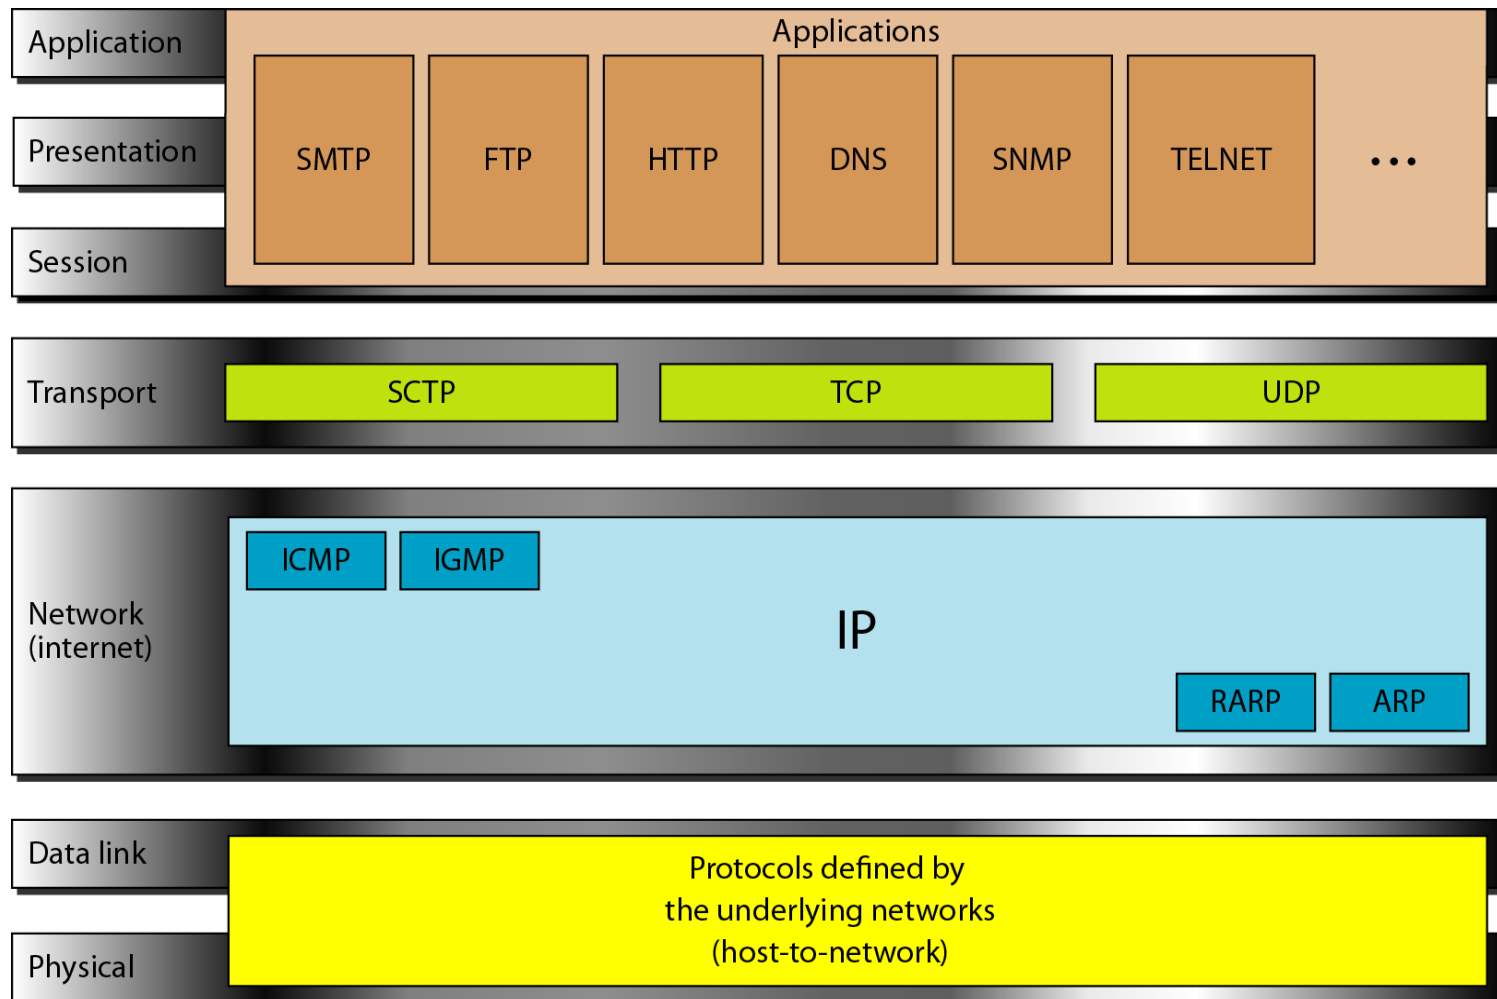

Purpose of this course

How do we get there?

- Internet Protocol Suite = TCP/IP model

A bottom-up approach

- Principles of digital communications
 - From electrical signals to bits to packets
- Using the physical infrastructure
 - Network access
- Finding your way
 - Addressing, routing
- Making use of it all
 - Applications

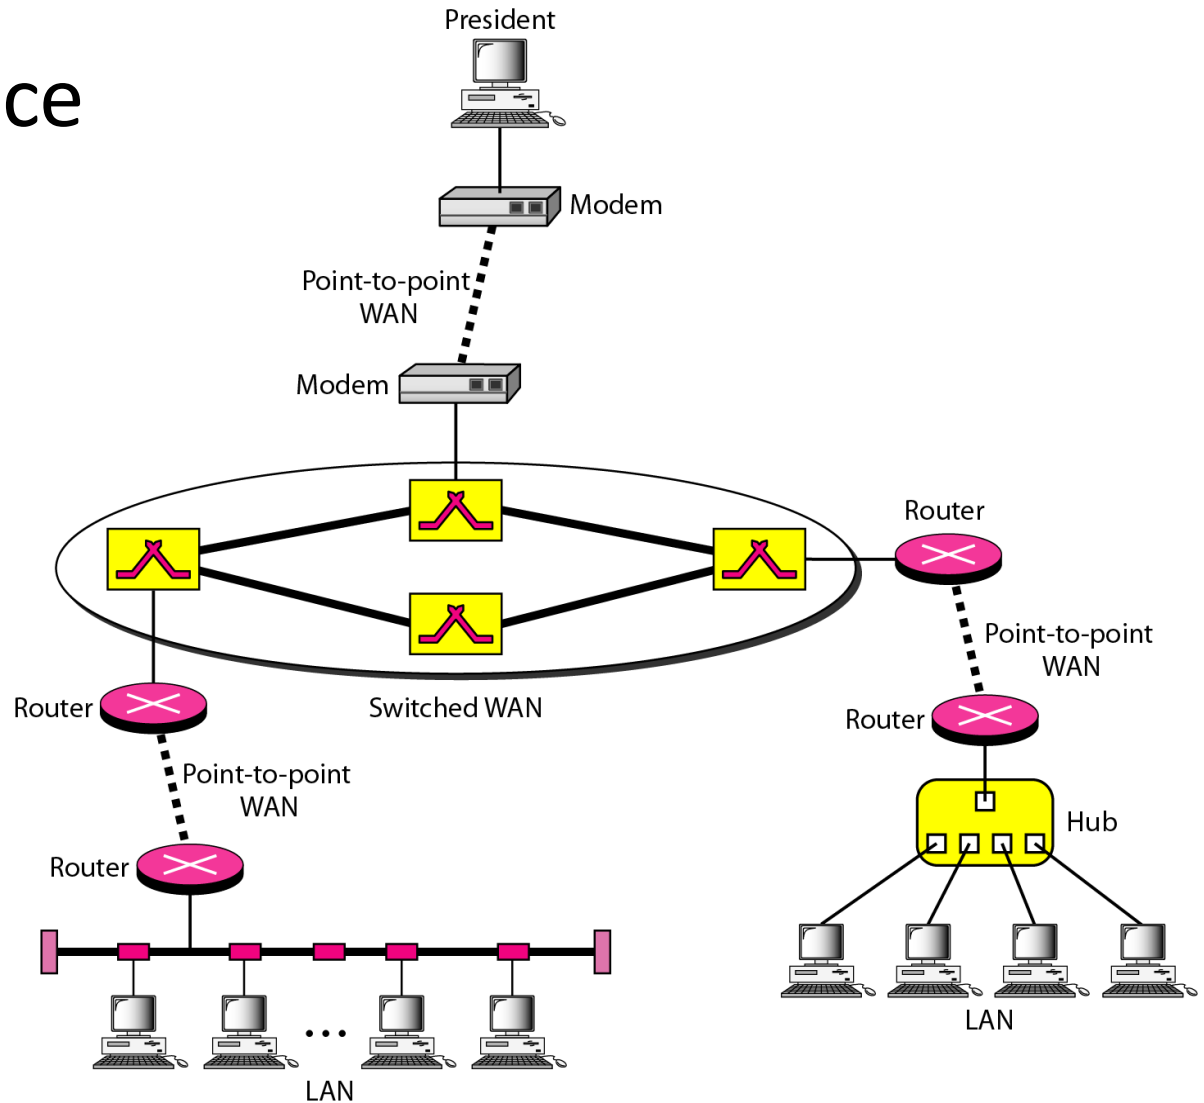

Today's lecture

Data Communications and Internet - An Introduction -

- Introduction
- Network models *[2.1-4][F2.1-3][K7.1]*

Network engineering

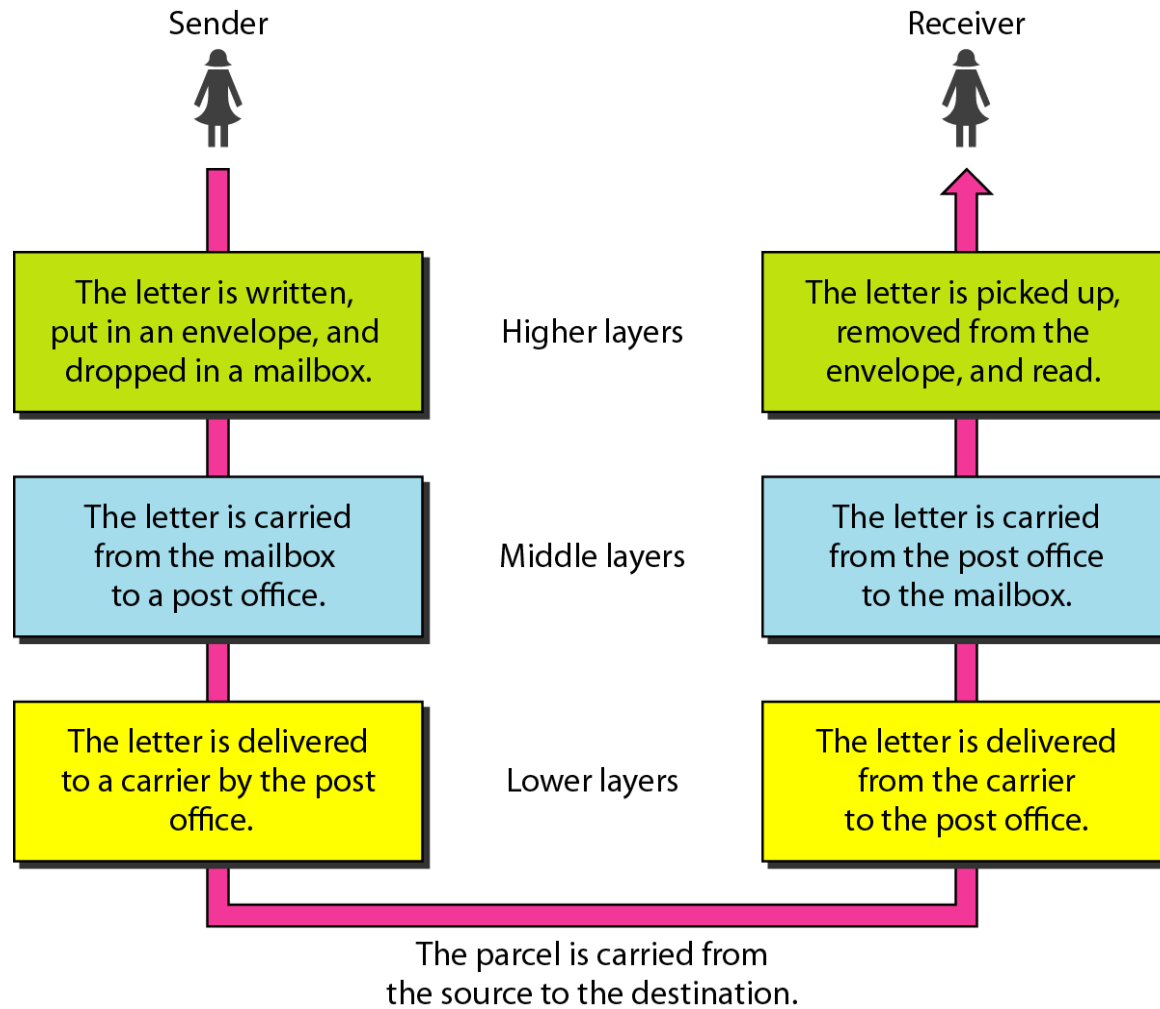

- High performance
 - Reliability
 - Throughput
 - Speed
 - Security

Network models

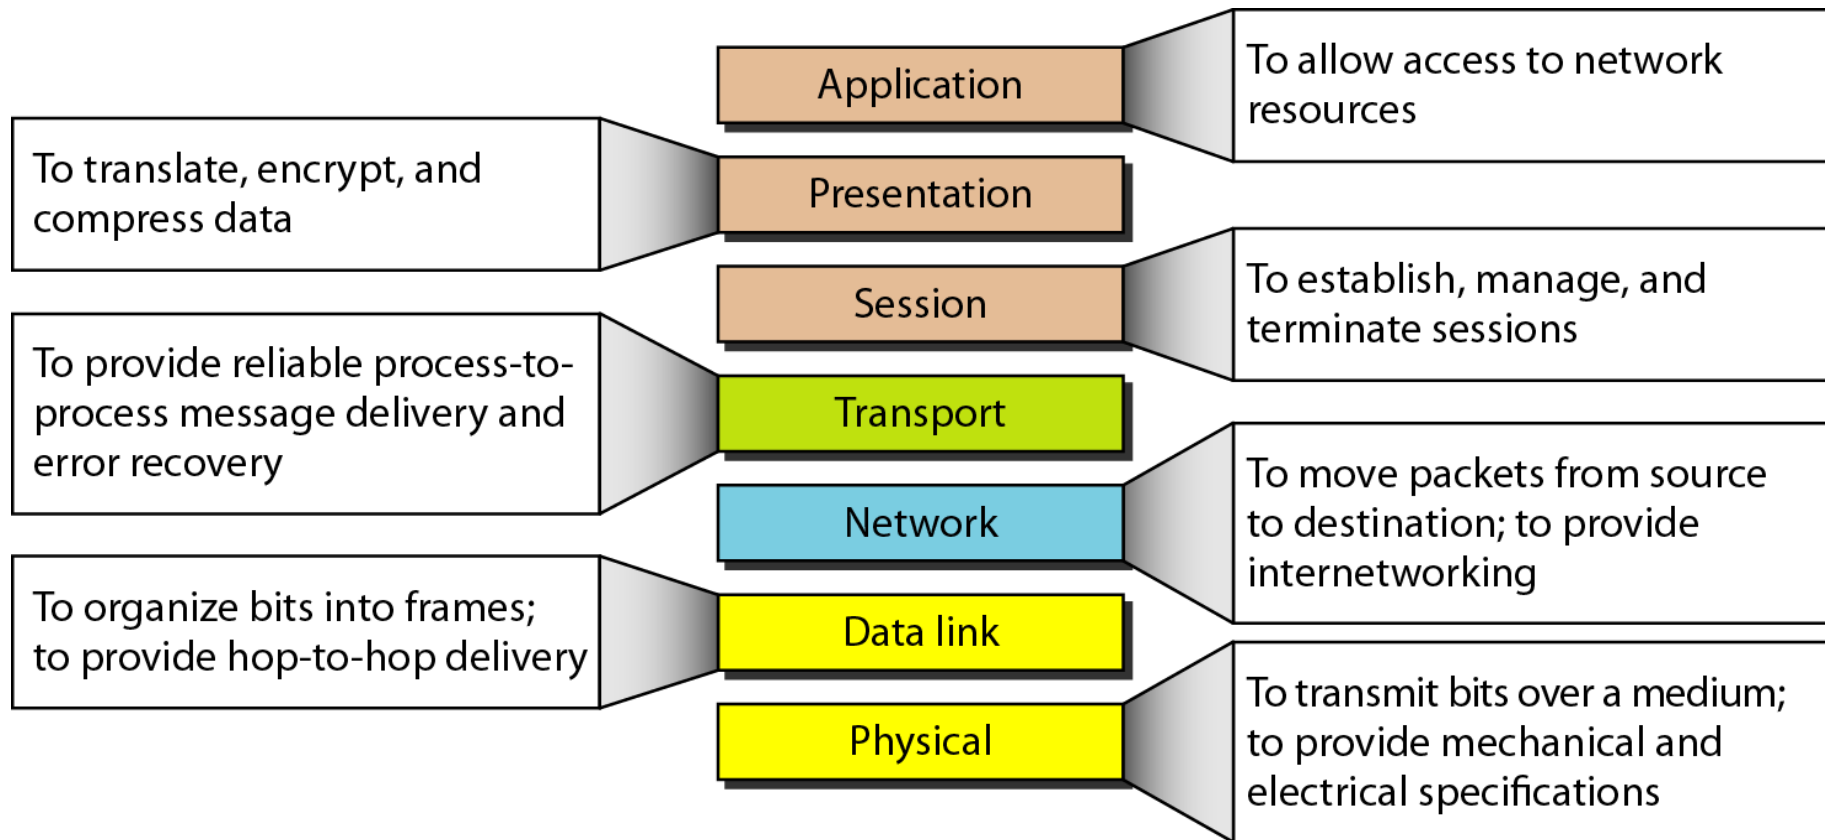

- Why?
 - Too complicated
 - Divide and conquer
- Layered architecture
 - Hierarchy
 - Specialisation
 - Simplification

Layer concept

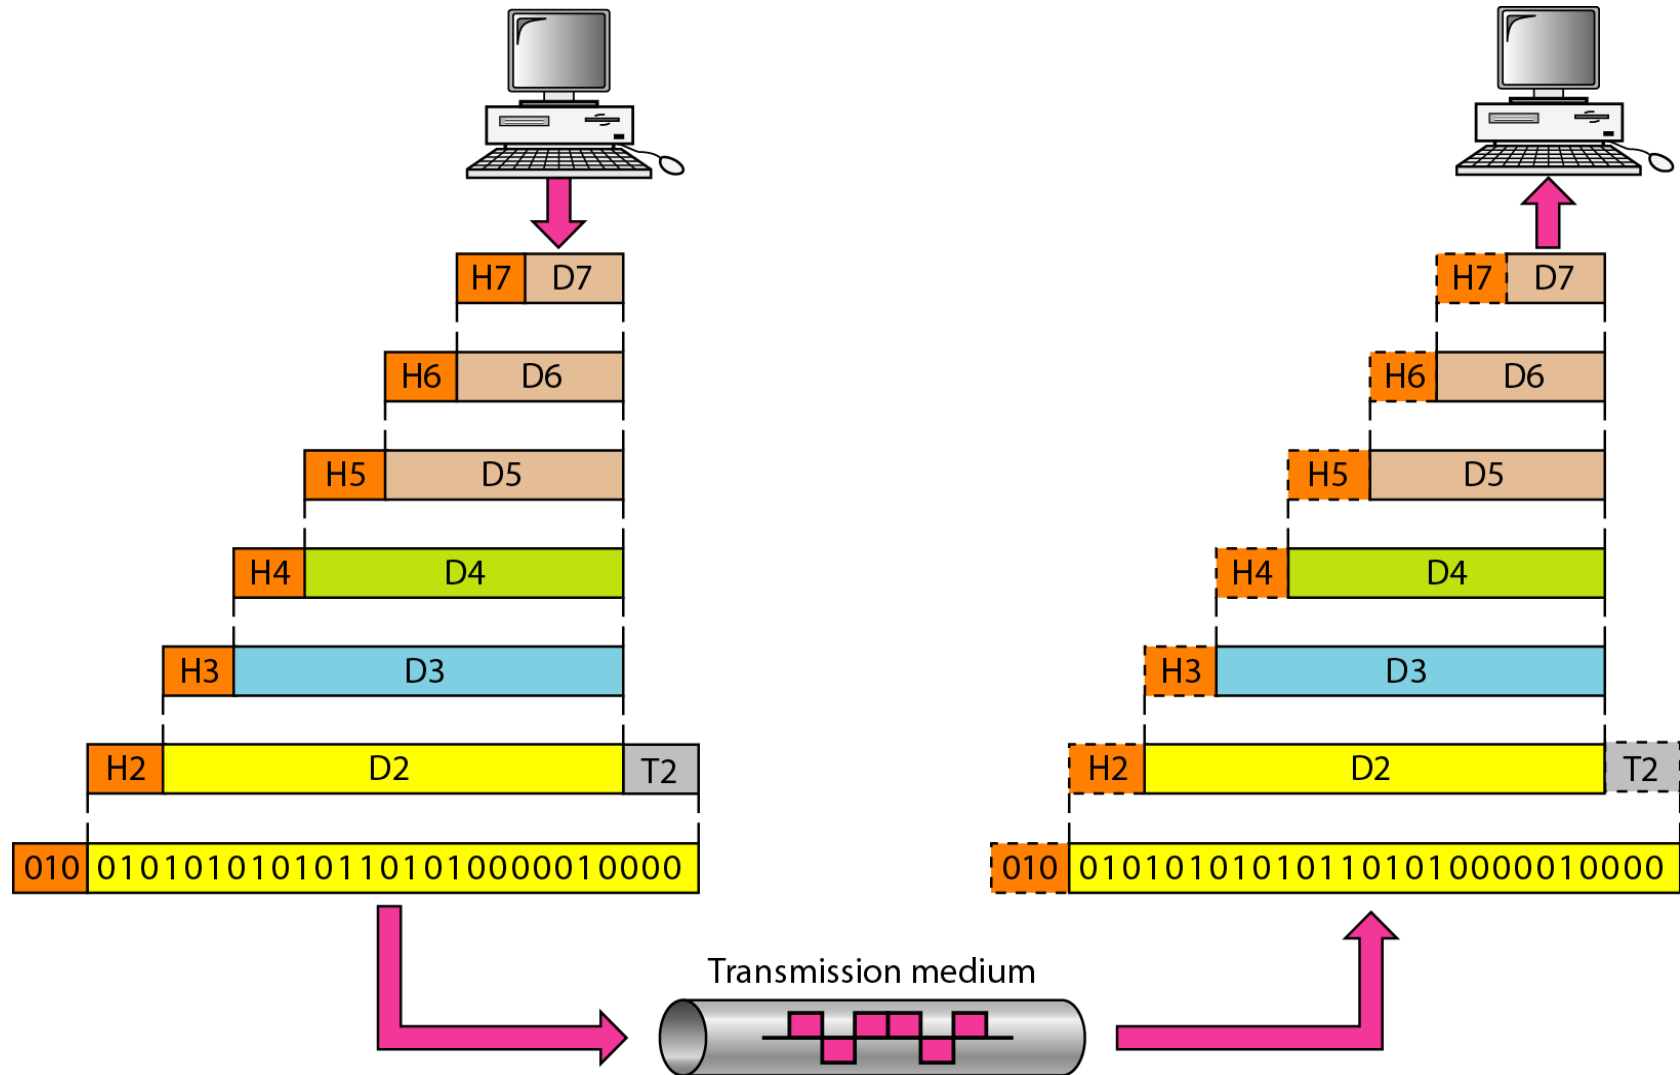

OSI model "Open Systems Interconnection"

- Developed by ISO, 1970~

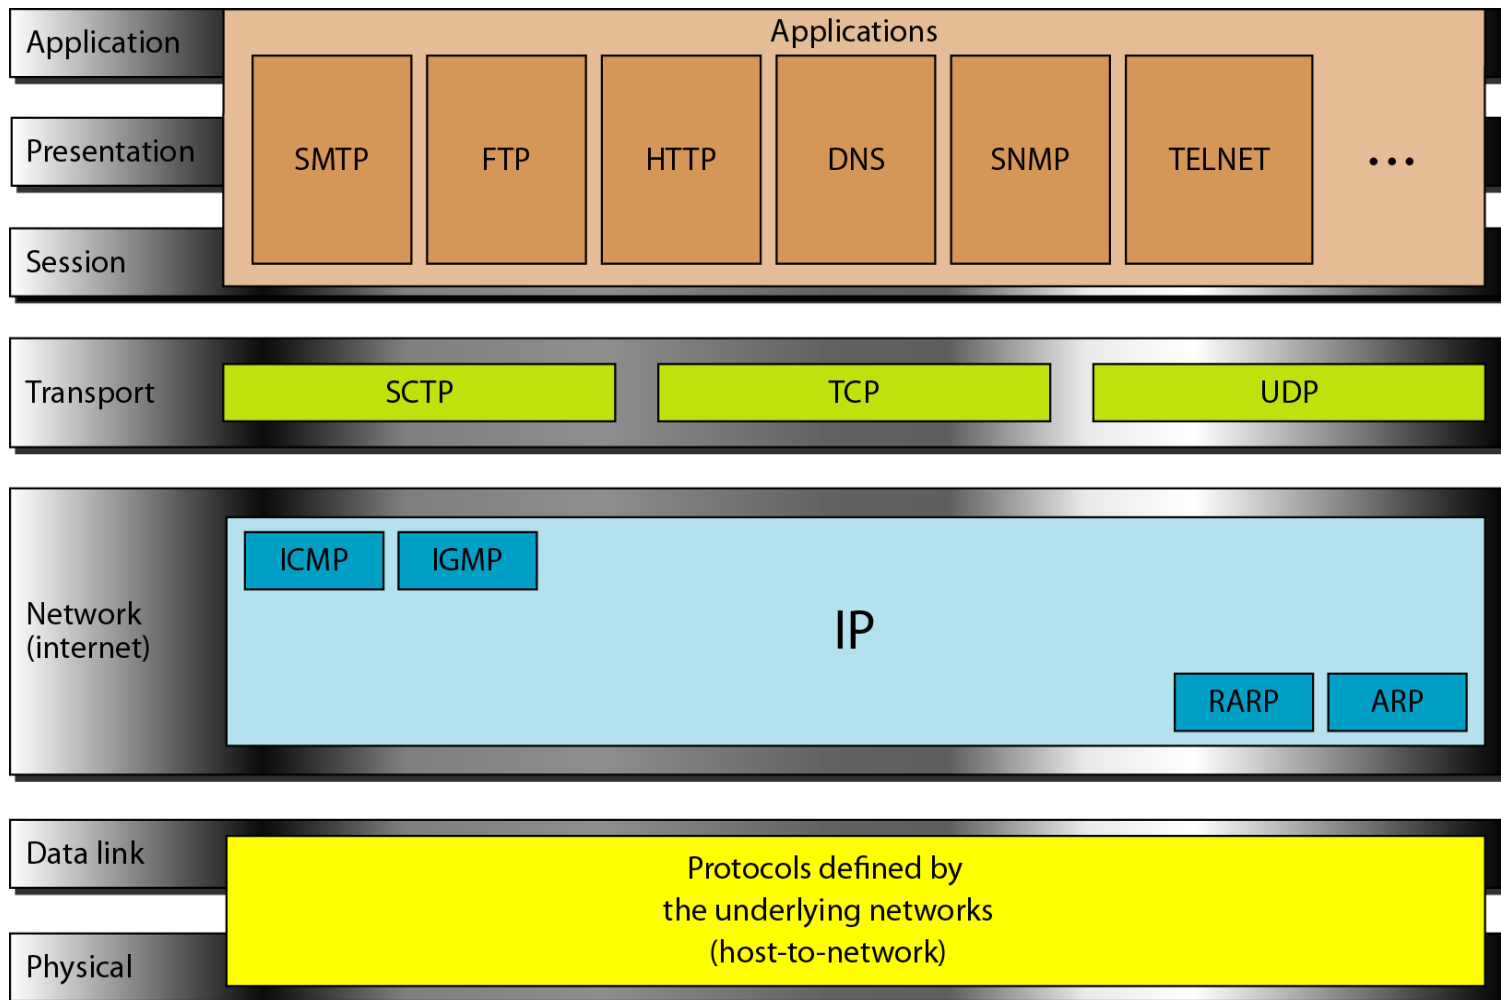

Encapsulation

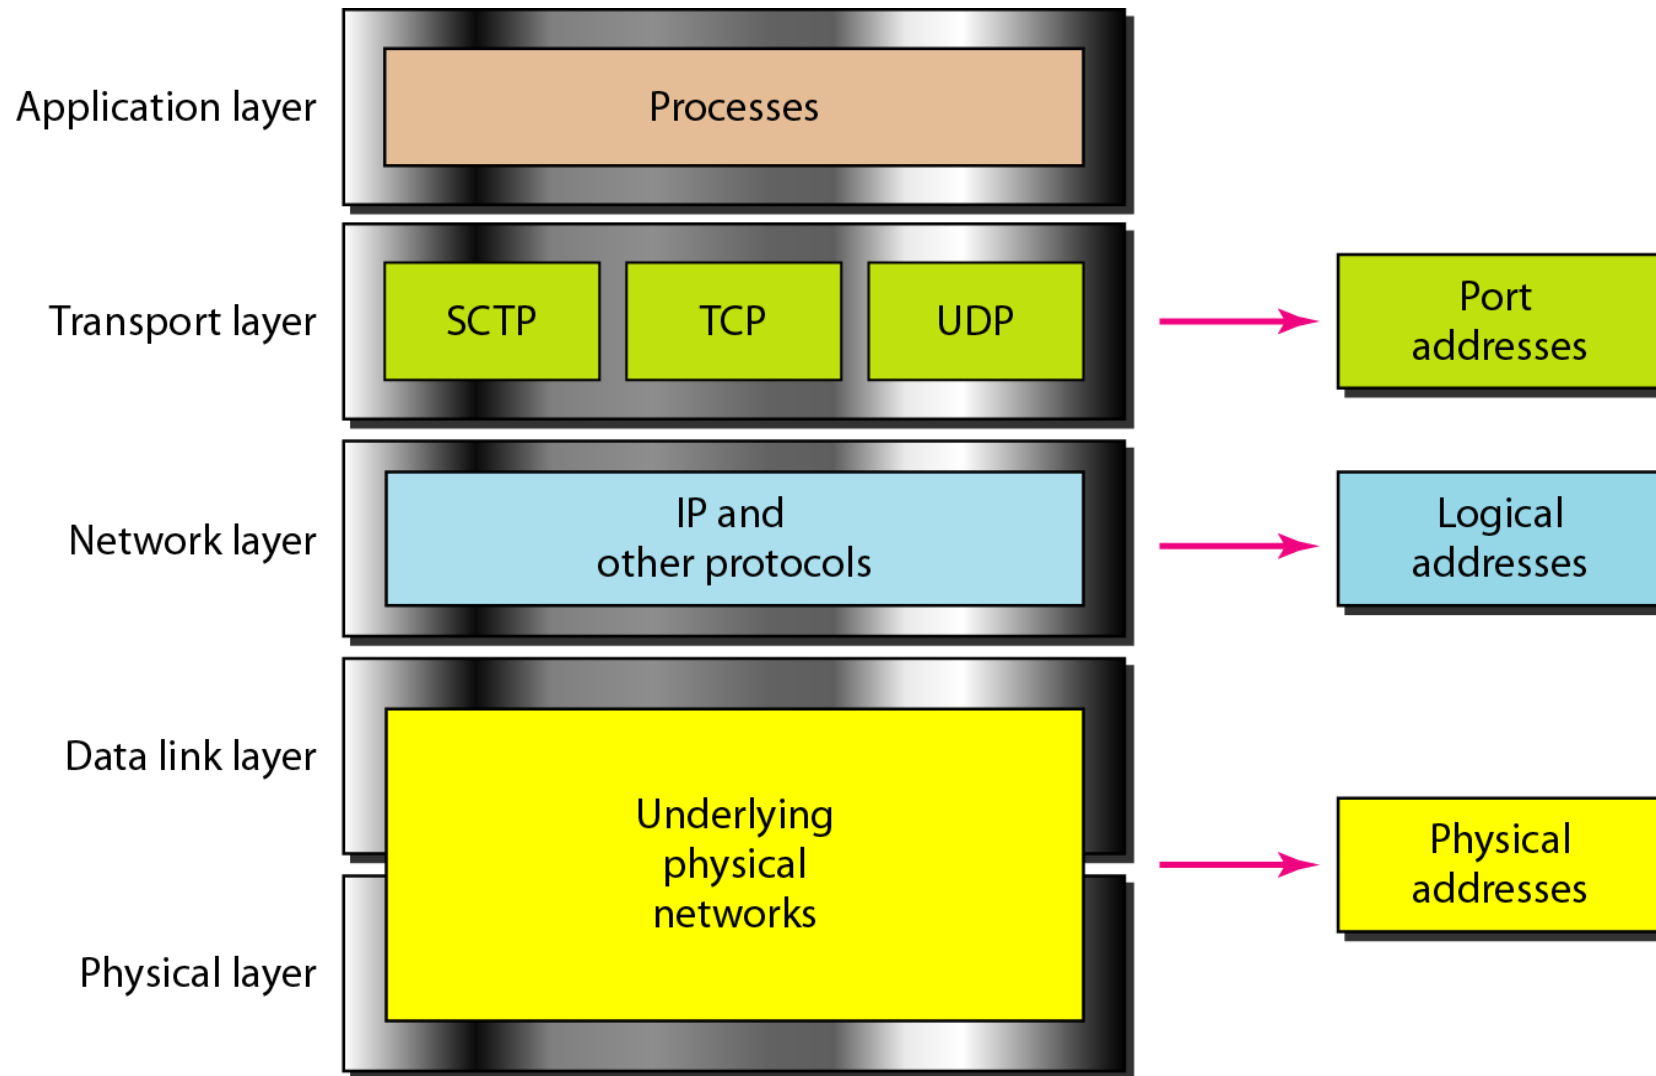

TCP/IP model

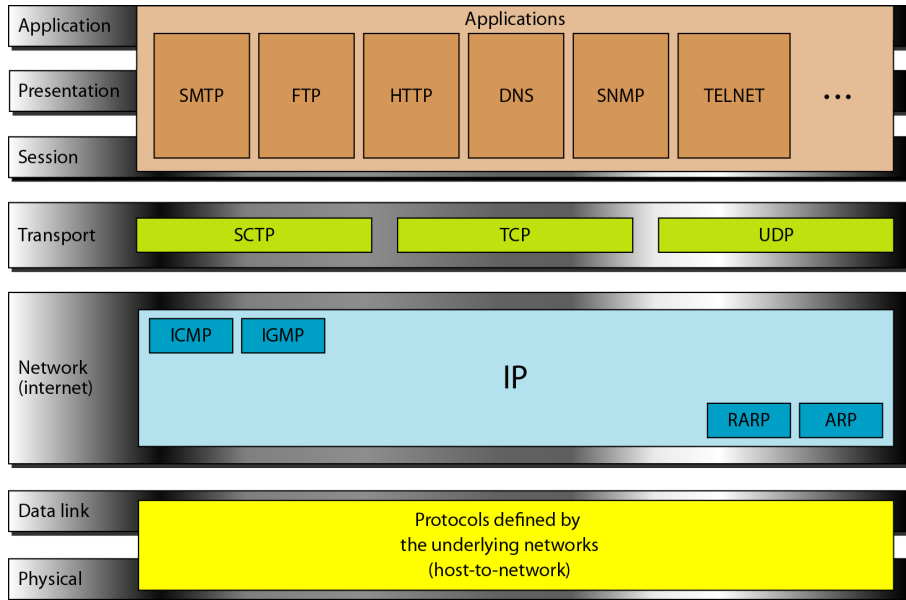

- Developed by DARPA, 1970~

Addressing in TCP/IP

See you in 15' :)

LUNDS
UNIVERSITET

Internet – Technology and Applications

<http://www.eit.lth.se/course/eitf25>

- Mandatory alternative for I_{3D} students
- Optional for BME₄, F₄, Pi₄ students
- 6 credits
- Level G2 (basic)

Course Objectives

- Understanding data communications
- Understanding the basics of Internet
- Practice with networks and protocols
- Critical judgement of theory and praxis

Intended Learning Outcomes

1. *Knowledge and understanding:*

- a) **Explain** the basics of how computers communicate; **apply** their knowledge into given topologies;
- b) **Explain** how the Internet protocol suite operates; **describe** the functions of various protocols;
- c) **Explain** how Internet applications work; **be aware of** the security risks associated with these.

LUNDS
UNIVERSITET

Intended Learning Outcomes

2. *Skills and abilities:*

- a) **Use** Internet applications;
- b) **Design and code** basic web pages;
- c) **Use** network analysis tools and **analyse** communication protocols.

Intended Learning Outcomes

3. *Critical judgement and evaluation:*

- a) **Formulate** the relation between the various Internet protocols;
- b) **Evaluate** the suitability of an Internet protocol for supporting a given application type;
- c) **Make** simple security judgements.

Assessment

	Intended Learning Outcomes	Activities	Assessment Tasks
Knowledge and Understanding	Explain the basics of how computers communicate; apply what they learned into given topologies	Student reading, Lectures, Exercise sessions	Individual work in online quizzes and final take-home exam
	Explain how the Internet protocol suite operates; describe the functions of its various protocols		
	Explain how Internet applications work; be aware of the security risks associated with these		
Skills and Abilities	Use network analysis tools and analyse communication protocols	Laboratory projects 1, 2	Project reports 1, 2
	Design and code basic web pages	Laboratory project 3	Project report 3
Critical Judgement	Formulate the relation between the various Internet protocols	Final take-home exam	Individual work in final take-home exam
	Evaluate the suitability of an Internet protocol for supporting a given application type		

LUNDS
UNIVERSITET

Mon	Tue	Wed	Thu	Fri
				Lecture 1
Lecture 2	Exercise			

Course Structure

- 1 intro + 10 lectures
- 5 exercise sessions
- **3 laboratory projects**
- **2 hand-in problem sets**
- **1 final take-home exam**

Lectures

- L01: Physical layer
- L02: Flow control
- L03: Network access
- L04: Network layer
- L05: Routing
- L06: Transport layer
- L07: Security
- L08: Application layer
- L09: Mobile Internet
- L10: User applications

LUNDS
UNIVERSITET

Exercise Sessions

- One per each pair of lectures
 - L01+L02 → E01 etc.
- Coding, multiplexing, error and flow control
- IEEE 802.x, IP, TCP, UDP
- Routing, networking

Laboratory Projects ^{w. 49-50-51}

- Groups of two – online registration (Sign up)
- PPP Lab
 - **To do: Read docs, prepare, then book lab time!**
- Networking Lab
 - Uses , see <http://www.wireshark.org>
- WWW Lab

LUNDS
UNIVERSITET

Hand-in Problem Sets & Take-home Final Exam

- Same rules apply as in a written test
 - Individual work (**no groups**)
 - Original answers (**no copying**)

Workload Distribution

6 credits	160 h
Lectures and exercises	30 h
Hand-in problems & take-home exam	16 h
PPP lab (~4 days)	32 h
Networking lab (~2 days)	16 h
WWW lab (~2 days)	16 h
Self study time	50 h

LUNDS
UNIVERSITET

Literature (1)

- Data and Computer Communications
 - William Stallings
 - 10th ed, Pearson

LUNDS
UNIVERSITET

Literature (2)

- Data Communications and Networking
 - Behrouz A. Forouzan
 - 5th ed, McGraw-Hill

LUNDS
UNIVERSITET

Literature (3)

- Datakommunikation och nätverk
 - M. Kihl, J.A. Andersson
 - Studentlitteratur, upplaga 1:2
 - Facit till övningsuppgifter

LUNDS
UNIVERSITET

Staff

Course head:	Stefan Höst
Lecturer:	Kaan Bür
Exercise guide:	William Tärneberg
Lab guide:	?

LUNDS
UNIVERSITET

Final Remarks

- Elect two course representatives
 - Give them feedback
- Course evaluation
 - Help us to improve the course
- Recommended follow-up course
 - ETSF10 Internet Protocols

LUNDS
UNIVERSITET

Most Important

Plan ahead your time!

ENJOY THE COURSE!

Today's Programme

- **Survey** on subject familiarity
 - with previous exam in ETSF052
"Computer Communications"
- Note that ETSF052 exams are 5 hour long, and no help (e.g. books or Internet) is allowed.
