WE ARE INCREASINGLY DEPENDING ON SECURE IT SYSTEMS

LuckyMouse hits national data center to organize country-level waterholing campaign

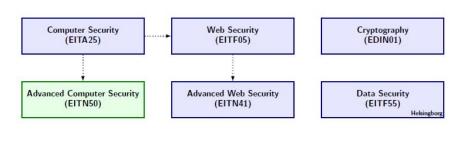

In March 2018 we detected an ongoing campaign targeting a national data center in the Central Asia that we believe has been active since autumn 2017. The choice of target made this campaign especially significant – it meant the attackers gained access to a wider range of government resources at one fell swoop. We believe this access was abused, for example, by inserting malicious scripts in the country's official websites in order to conduct watering hole attacks. 8578 8571 E5

Course Objectives

The goal of this course is to give the students an in-depth insight into the main problems and solutions within security for computers, embedded devices and networks.

As such it deepens acquired knowledge on computer security from earlier courses and gives an analytic understanding behind today's security solutions. This will allow the student to select by him/herself among existing solutions and/or to present solutions with good quality.

End Terms

- Be familiar with the challenges of building a secure system using trusted computing, secure networking and identity solutions
- Have a basic understanding of means and methods that provide increased security
- Have a basic understanding of risks
- How to act when something goes wrong
- Got some documented hand-on experience in selected areas

IMPORTANT

 The projects you do in groups of two people. Send me the names of the persons in your group and I will compile a list,

Course Organisation – work setup

- Lectures
 - 26 hours
- 5 projects and quizzes
 - 170 hours
- Teachers:
 - Ben Smeets (kursansvarig)
 - Mustafa Albayati (support with projects)
- This course requires students to seek much information on their own – with the provided material helping to narrow down your search for information.
- WEB http://www.eit.lth.se/kurs/eitn50

Examination setup

- Grading scale: TH (U,3,4,5) (Fail, Three, Four, Five)
- Assessment: To pass this course all projects must be approved and all theme tests (5 quizzes) must be passed.
- Quizzes: Thresholds for passing is 70%.
- For grade 4 or higher you need to answer/do the B type assignments parts of at least 4 of the 5 projects.
- When you qualify for grade 4 you can obtain grade 5 through an oral exam. Students should always sign-up for such or any other oral exam.
- signup for oral exam is required.
 Send email to Ben or Erik Göthe (kursexp@eit.lth.se)
- Re-examination in ordinary re-examination period: Oral exam.

Final grading

- For grade 4 or higher you need to answer/do the B type assignments parts of at least 4 of the 5 projects.
- When you qualify for grade 4 you can obtain grade 5 through an oral exam
 - Note: you have to ask Ben or course admin (Erik Göthe) at EIT for this/any oral exam

13

Group/Project work

- Groups of 2 persons
- 5 Projects (previous slide)
 - 1 project is examined by a quiz
 - 4 written reports for the other projects. Projects have A and B type assignments. A type are mandatory and B type you need to do if you want a grade 4 or higher.
- Try to work at home but In the laboratory at 4th-floor E-building you have PC's that you can use to solve the problems.
- The times in TimeEdit shows the bookings made for this course but you can outside these hours use the laboratory as well. However outside the reserved bookings you have to give room to bookings of other courses.

5 Projects/Laboratory (with links)

Project Lab	Release Date (latest)	Planned Content	link to the assignment	First Deadline (at 23.59)
А	4/9	Forensic Analysis of disc and USB drive image	<u>Forensics</u>	17/10 quiz
В	4/9	Object security in communication	<u>Objsec</u>	26/9
С	17/9	TPM use	<u>TPM</u>	3/10
D	2/10	Anatomy of an Exploit	Exploit	20/10
Е	2/10	Design secure camera	Camera	24/10

Quizzes close at 28/10 Last report update 20/10 Except project E: 24/10

4.4

Covid-19 implications for projects

- Conditions for projects are as follows. Like previous years most projects can
 be done at home. For some (parts) you need to run a Virtual Machine, in
 Virtual Box. Therefore we keep the possibility to do those parts in our
 labspace. For that reasons, we keep the labspace bookings (shown as
 "Projekt) in Time-Edit.
- Note that when you use our labspace you have to adhere to the university guidelines due the risk of Covid-19 virus spreading. You are not allowed in the labspace to sit shoulder-to-shoulder and the amount of people is restricted to. Daniel will keep office hours and you can book meetings with him. He has instructions and decides when to use protective masks when social distancing cannot not be kept.

Reports - format

- Reports must contain description/documentation of your project work so others understand what you have done/can repeat your experiments.
- Each report must contain the following statement:
- "Rapporten är eget orginal arbete och källor av all icke egen material är angiven"
- the names of the authors and their group number: adsecXY
- Reports may be used during discussions or oral exam
- Reports should be submitted in pdf/txt form (not as scanned images in pdf file)
- Reports will be screened using "Ouriginal (Urkund)" for plagiarism

info: https://www.lub.lu.se/sok/urkund).

17

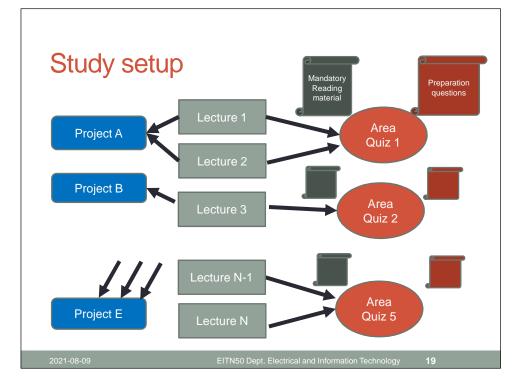

Quizzes

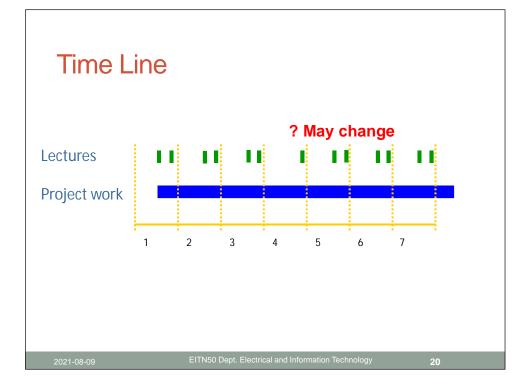

- There will be 6 mandatory short quizzes available via course Canvas
- The purpose of these quizzes is to test your overall understanding in 5 different areas and 1 quiz is to test you on one of the projects/labs in this course.
- Some questions are simple and some may require you to think a while. Of the
 possible answers you have to choose the BEST alternative (in case you
 think more than one make sense).
- You have 2 regular attempts to pass the quizzes. You can do a quiz whenever you want after it is made available. But you will have at most two hours from starting a quiz until you have to submit your answers. For passing 70% of your answers must be correct. Quizzes close on October 28. If you need to more than two attempts you need to contact Jonathan or Ben. If this happens too often we cap your maximum grade to 3

Where

Lectures:

Wednesday: 15.15-17.00:Friday: 13.15-15.00:

Zoom link except Intro which uses the link shown on Canvas

• Meeting ID: 698 7727 7588

Password: 043269

(no password for Intro lecture!)

Project work: EIT 4th floor,

 You must have signed-up to the course for having access to the laboratory rooms

 In the laboratory you have PC's that you can use to solve the problems. You should try to work at home. Mustafa may help you to get the virtual machine images.

2021-08-09

21

Schedule – tentative

Date	Planned Content	Link
1/9	Introduction, Forensics: self study <u>C Altheide(video)</u> ,	Intro, Lect1
3/9	walkthrough of quiz preparation, Forensics finish, Crypto applied, Ways of Encryption , Perfect Foward Secrecy, Object security,	Lect2
8/9	Network security: AAA, Securing communication, TLS, IPsec	Lect2 cont'd
10/9	Network security: Project B,IoT, GSM, LTE, DDOS, botnets	Lect3
15/9	Trused computing: General concepts, What are the challenges, Roots of Trust,	Lect4
17/9	Platform security: TPM	Lect 4, contd
22/9	NO LECTURE	
24/9	Platform security: TPM fort, UEFI, Intel TXT, Trusted Computing Pools, TEE, Project C	Lect5
29/9	SGX,ARM TrustZone	Lect6
1/10	EPID, ARM TrustZone, HSM, Smartcards (self-study), NFC	Lect7
6/10	PUFFs, Virtualization, SELinux, Java, Containers, Android, iOS, BYOD	Lect8
8/10	Homomorphic encryption, Database operations on encrypted data, Cloud computing, Secure VM launch	Lect9
13/10	Security and Economics, DRM, Block chain, Software Security: ROP attack, SW design, writing and analysis,	Lect10, Lect11
15/10	Project E: Common Criteria, EAL2	ProjectE,

Grouping

• Send me your names!

2021-08-09

EITN50 Dept. Electrical and Information Technology

22

Course material

- Handouts of slides, articles, reports
- Access: user=eitn50, pass: (given at first lecture)
- Only distributed via web (some material will only be available on local network, laboratory)
- Books:
 - There is no book that covers all the topics of this course, instead there is a list with relevant reading material published on the course web

May change

Final remark

- In this course it is expected that YOU look for additional information beyond what is in the slides and support material.
- In the quizzes often more than one answer may be possible. Think what is then the answer that fits best. Do not rush through the quiz. You have ample time to think and do go through the preparation material for the quizzes.
