

Requirements for Project Plan (PP)

1. PP has to be max two A4 pages long.
2. PP must be written in English.
3. PP must be submitted electronically as a PDF or Plain Text file.
4. Only one PP has to be submitted per group.
5. PP must contain the group number in a document title.
6. PP must list names and email addresses of all the developers in the group.
7. PP must contain the date of document preparation.
8. The following parts must be covered in PP:
 - a. Introduction/Background.
 - b. Aim of the project work.
 - c. Requirements.
 - d. Project activities' and time plan.
 - e. Delivery dates.
9. "Introduction/Background" part should briefly describe the modeled system, project setup, involved parts and their interaction, and development environment.
10. "Aim" section should cover the purpose and scope of the main project work.
11. "Requirements" part should present project requirements. The minimum requirements are stated in the document called "Assignment". These minimum requirements may be complemented with extra requirements if so desired by the developer group.
12. Information in the "Project activities and time plan" part should be presented in form of a table. The table should list project activities planned in each week of the project and estimated time for them. The time estimation should be given for each developer in the group, i.e., reflect how much time each group member will spend with each activity. Time for all activities must be estimated, including reading, planning, writing documents, etc.
13. "Delivery dates" part should list dates for all planned deliverables (both documents and code).
14. PP has to be complemented with a deliverable covering planned Test Cases and Expected Result before the Evaluation meeting (preliminary in week 4).
