

# Practising what we preach

INFORMATION IN VIEW OF INTERNAL ENVIRONMENTAL AUDIT

# Sustainable Development Policy

---

- Driving force for sustainable development
- Provides reliable knowledge today and in the future
- Research promotes sustainable development, both as a process and its results
- Students gain insight and knowledge about aspects of their subjects which are relevant to sustainable development
- We “practice what we preach”

# How to take responsibility for Sustainable Development?

- "Together we work to understand, explain and improve our world and the human condition."

*(Lund University Strategic Plan 2012-2016)*

## **Let's discuss:**

- How are we at Lund University to take responsibility for sustainable development? How can we follow the ambition in the Policy? What can we do – as a University and as individual employees?

# Here and now?

---

- Your environmental coordinator tells us about your environmental work (your environmental certificate – “the frog”)

# Internal Environmental Audit Dec 16

---

- Purpose: to check whether you have a working environmental management system (does “the frog” work)?
- Example of questions from the auditor:
- **”How can you, in your professional role, contribute to the environmental work here?”**
- **”How can you, in your professional role, contribute to your environmental goals?”**
- **”Where can you find information about your environmental work?”**
